Explore our TRIOS portfolio and find the TRIOS intraoral scanner that's right for you.

Choose your service level

Do you prefer a complete peace-of-mind service agreement or a basic agreement with zero ongoing costs?

Offer same-day treatment

Find out how TRIOS Studio apps let you offer patients fast, hassle-free same-day treatment.

Better patient care, today and tomorrow.

Step into the world of digital dentistry with 3Shape TRIOS® in hand, and discover a long list of opportunities. Opportunities that go well beyond a faster, easier way to take impressions that are more comfortable for your patients.

You'll have the opportunity to engage and counsel your patients even more. Which in itself creates an opportunity to build confidence and increase treatment acceptance. And that will give you a virtual mandate for the excellent, long-lasting, aesthetic, naturally functioning treatments that precision scanning with TRIOS makes possible.

Digital dentistry with 3Shape TRIOS also offers opportunities for your practice. Like the chance to expand your expertise with new treatment options and possibilities for more cost-effective ways of taking care of your patients and your business.

All of those opportunities come with the kind of peace of mind you can only experience when you work with a proven product that tens of thousands of dentists like you use successfully every day. It also comes with the backing and support of the company that started the digital dentistry revolution more than twenty years ago. The same company that's been perfecting intraoral scanning ever since.

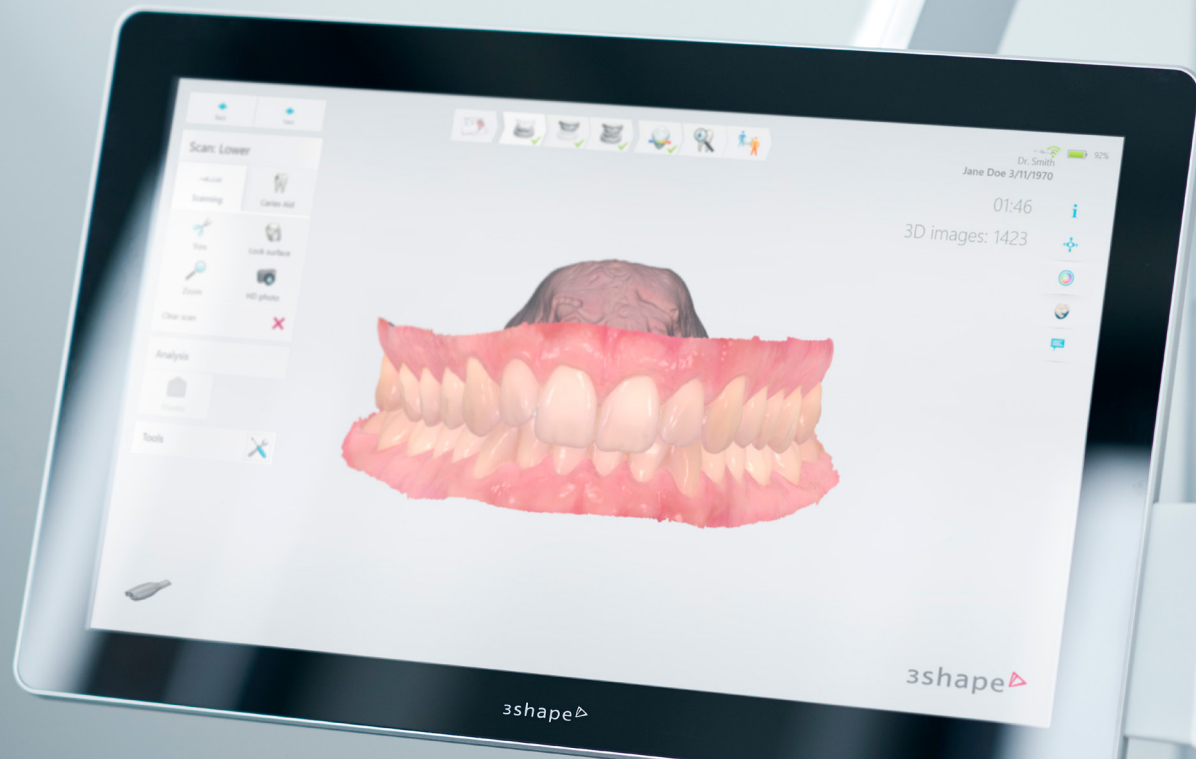

So why not take your first steps into digital dentistry right now?

“ Going digital allows me to
improve all aspects of treatment.

Dentist, London, UK

Dental treatments
that reflect your standards.

Precise digital impressions support treatment outcomes your patients will be happy with and you can be proud of.

Your patients can wave goodbye to a lot of discomfort and time in the chair. They'll be freed from the anxiety and discomfort that so often accompanies conventional impressions.

And you'll be certain that every impression taken with a TRIOS® intraoral scanner is as accurate as a conventional impression – or even more so.¹

Precise digital dental impressions support excellent treatment outcomes. So you can enjoy the satisfaction of delivering long-lasting, natural-looking treatments that reflect your high standards – faster and more effectively.²

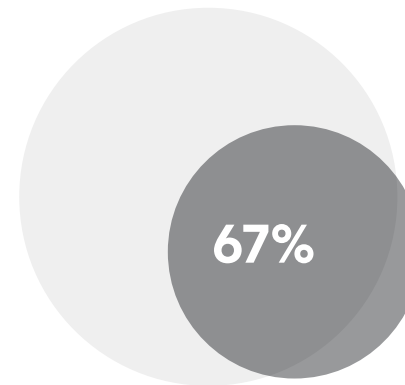

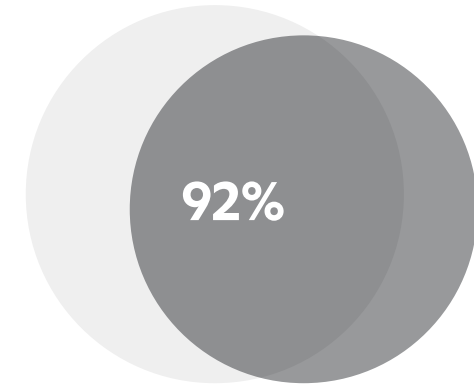

Rely on accuracy.

TRIOS® digital scanners use AI to “learn” from real teeth for long-lasting, natural-looking treatment outcomes. You can even capture and send precise occlusion and excursive jaw motion to your lab for a perfect fit. And digital dental impressions are more accurate than conventional impressions. In fact, 67% of digital impressions are more accurate than conventional.¹

92%

22 of 24 studies show the same level of **clinic acceptability**¹

67%

16 of 24 studies show digital impressions are **more accurate**¹ (in microns)

Comfort for them.

Less chair time, less anxiety, and no more gagging. Your patients will have a better experience because digital scanning is faster¹ and less invasive. You can complete full, accurate impressions in minutes. And treatments require only 2–3 visits on average.¹ No wonder 4 of 5 studies show patients prefer digital.²

Satisfaction for you.

It's fast, easy, and comfortable. So we think you'll enjoy the experience of taking digital impressions. And there's nothing like the satisfaction of treatment outcomes that please your patients and live up to your high standards. That's probably why 7 of 8 studies show dentists prefer digital, too.²

There's no question
that patients benefit
from counseling.
Or that engagement
builds confidence.

Boost case acceptance by engaging – even more – with your patients. Using 3Shape TRIOS® 3D color lets you show patients their unique dentition and share information about the health of their teeth and gums. The TRIOS engagement apps help you share even more. Together, TRIOS scans and engagement apps add weight to your recommendations. Which, in turn, improves case acceptance. Your patients will notice the difference. And you'll feel the engagement.

Personalize their experience.

3Shape TRIOS® and the 3Shape engagement apps are visual tools. They help you personalize patient experiences and ensure all concerns are addressed. Together, they create a perfect opportunity for patients to see and understand the condition of their dentition and their gums.

Feel their engagement.

Realistic 3D color scans help patients understand their situation and their options. TRIOS Patient Monitoring accurately tracks changes, so you can show them exactly why they need treatment. TRIOS Treatment Simulator generates 3D simulations of orthodontic outcomes. And TRIOS Smile Design creates a picture of their potential smile that they can share with friends and family.

Gain case acceptance.

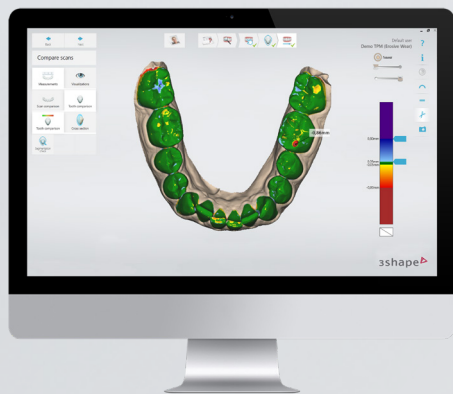

The more you and your staff engage with your patients, the more they'll benefit – and the more confident they'll feel. That's why using TRIOS and the 3Shape engagement apps adds weight to your recommendations. And why they're so valuable for case acceptance.

Learn more about patient engagement.

TRIOS patient engagement apps.

Our engagement apps make it easier than ever to communicate with your patients and increase acceptance of your treatment proposals.

TRIOS Patient Monitoring.

Accurately measure changes in dentition over time by scanning every patient at every appointment with TRIOS Patient Monitoring. It's a valuable visual tool that helps you identify treatment needs while also creating a perfect opportunity to engage and strengthen connections.

Explore Patient Monitoring.

TRIOS Treatment Simulator.

What better way to help patients accept your orthodontic treatment plans than by showing them their potential orthodontic treatment results before you even get started? TRIOS Treatment Simulator simulates realistic orthodontic corrections onscreen based on a 3Shape TRIOS intraoral scan. In full color. In just seconds. What a revelation!

Explore Treatment Simulation.

TRIOS Smile Design.

Everyone wants to know how their teeth will look after restorative treatment. Now you can show them. TRIOS Smile Design lets you digitally design their potential new smile before their eyes. Then you can give them a true-to-life picture they can share with friends and family.

Explore Smile Design.

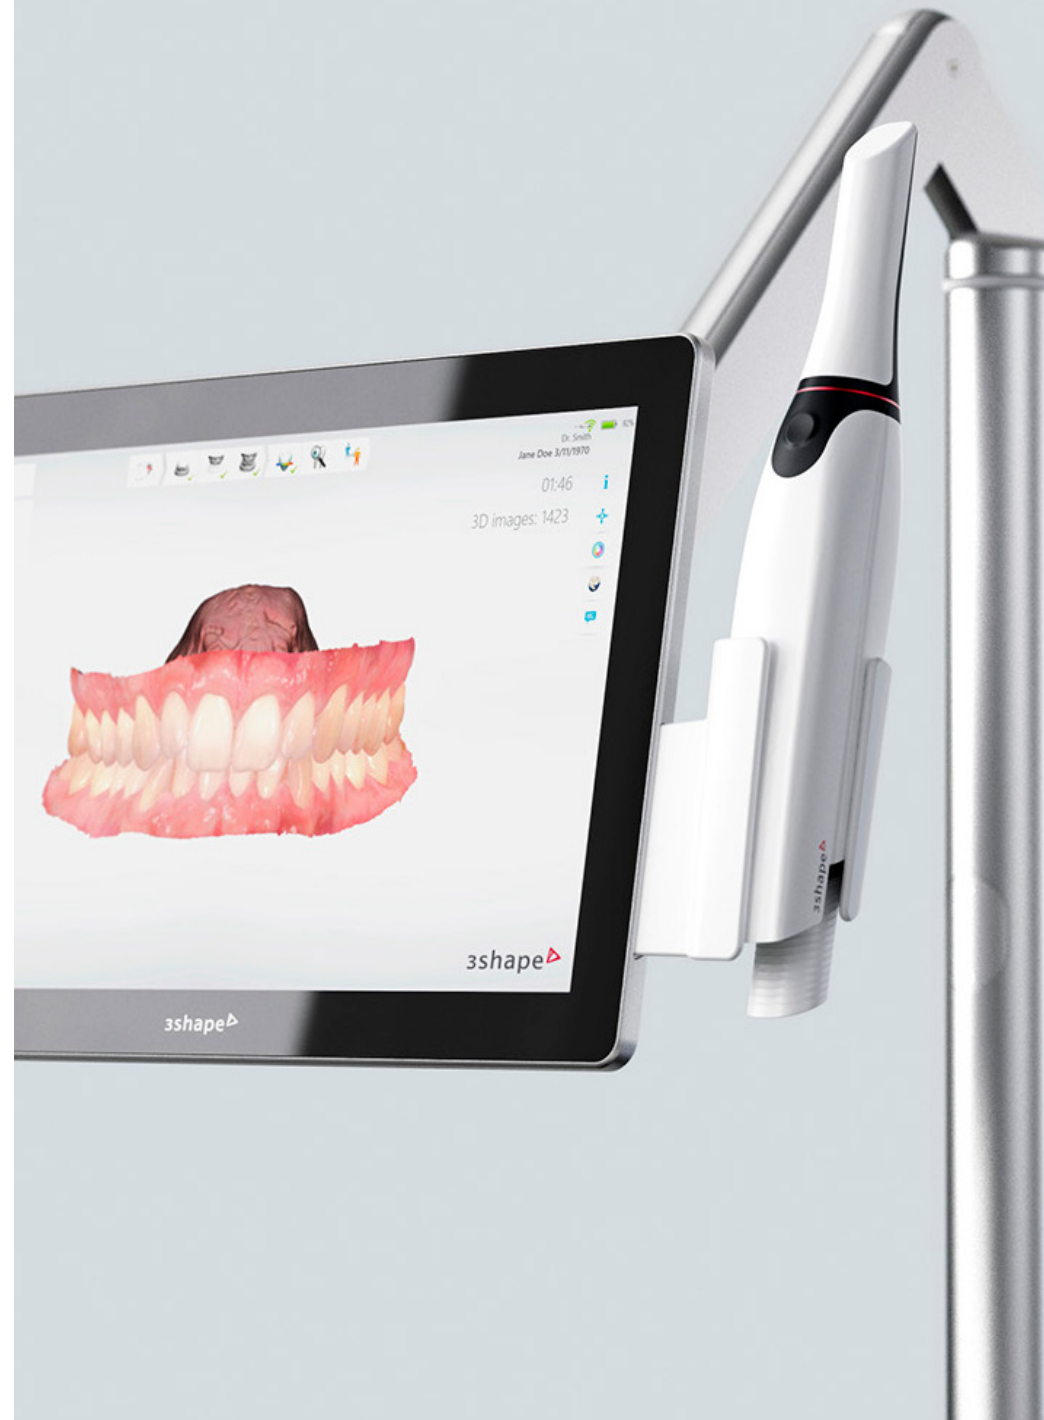

3Shape TRIOS MOVE+ for maximum engagement.

Now you can put 3D digital scans and the TRIOS® engagement apps right where your patients can see them best – chairside. TRIOS MOVE+ is an intraoral scanning setup that makes it even easier to interact. And a lot more comfortable for both of you.

Learn more about maximum engagement.

We think you'll find your patients are happier¹ and your practice is more successful with TRIOS intraoral scanners.

And we'll make sure you have everything you need to get started quickly and continue on your digital journey when you're ready with onboarding and opportunities for advanced learning.

Plus, you decide which treatments you want to start your digital dental scanning experience with. Then – if you want – you can explore new indications at your own pace.

A more successful practice.

The happier your patients, the better for your practice. Give them a faster, more comfortable experience with 3Shape TRIOS® digital scanners. They'll come back – and they'll refer their friends. You can also promote your clinic with a chance to experience the latest in dental technology. And you'll gain efficiency and profits through savings on materials and lab fees, streamlined processes, and less time spent chairside.¹

80%

A smooth digital journey.

Everything you need for a smooth digital journey. Onboarding by our partners helps you get started right away. Then, you'll have access to extensive online training developed by 3Shape experts. And if you want to dive deeper, stay up to date with digital innovations, or explore new indications, there's a long list of advanced learning opportunities available. Sessions with key opinion leaders, on-demand webinars, how-to guides, and a support forum are just a few.

Expanded expertise.

TRIOS® intraoral scanners open the door to expanding your clinical expertise. We offer a wide selection of treatment options spanning clear aligners, traditional orthodontics, implantology, guided surgery, and beyond. Just decide which treatments you want to start with and then strengthen your skills and knowledge at your own pace. TRIOS won't force you to begin with more than you're comfortable with, and access to thousands of labs and manufacturers means you'll never feel locked in.

TRIOS 3 Basic

Just scan and send.

TRIOS 3 basic gives you a simple, cost-effective way to get started with digital dentistry. Use it to take digital impressions that are comfortable for patients and at least as accurate as conventional impressions.¹ Then send the impressions to your choice of labs with a couple of clicks. And because our color scans create an opportunity to show patients their dentition and share information about their teeth and gums, TRIOS 3 also supports patient engagement.

Explore TRIOS 3 Basic.

TRIOS 3

Gain case acceptance.

This wireless or wired 3Shape scanner comes with all of the TRIOS® engagement apps: TRIOS Treatment Simulator, TRIOS Smile Design and TRIOS Patient Monitoring. So, you can preview orthodontic and restorative results. And you can explain your treatment plans more easily. You'll add weight to your treatment recommendations. Which is a great way to increase case acceptance. And, of course, our scan-and-send system is as easy and convenient as ever.

Explore TRIOS 3.

TRIOS 4

Extra support for excellent outcomes.

TRIOS 4 wireless scanner adds advanced diagnostic capabilities to its list of digital advantages. That means you don't need a separate scanning device to benefit from advanced fluorescent technology for caries identification. Because we've built it right in. You also get the added convenience of 30% longer battery life, and always fog-free mirrors when you choose this top-of-the-line intraoral scanner.
